The F4 FireTech Escape System is UL certified to NFPA 1983 Emergency Escape System. This system has a total weight of 3.15 lbs and includes 50 feet of FireTech 32 with a sewn eye, Crosby firefighter anchor hook, F4 escape device, and Sterling SAFE-D carabiner, all packed within a heat resistant bag for easy deployment. The hook fits securely in a front pouch and the preloaded F4 is held in place by a heavy-duty elastic strap. The entire system is secured by two side anti-debris flaps and a cover flap to keep the components from adjusting or falling out during operations. This system is lightweight, low profile, very durable and will accommodate different style harnesses.

In addition to each component of the F4 FireTech escape system, all Sterling escape ropes are UL certified to NFPA 1983, allowing departments to customize an escape

\$1
\$1.00 of every F4 device sold will be donated to the National Fallen Firefighters Foundation.

All components proudly made in USA.
